## What is Health on Wheels?

Health on Wheels is a mobile medical clinic providing care in shelters, patient homes, encampments, and anywhere help is needed. Its mobile clinic capabilities can provide on-the-spot mental health care, medical services, and harm reduction resources outside of traditional healthcare settings.

The clinical team includes a nurse practitioner, registered nurse, mental health worker, harm reduction services, and the support of the Shelter Health Network. Peer support workers will provide the knowledge and empathy that come from first-hand experience.

Now, more than ever, community services, including Good Shepherd, play a key role in addressing social issues faced by many communities. Health on Wheels enhances services available to people confronting healthcare barriers in Hamilton.

## Our Mission

Health on Wheels drives enhanced collaboration with healthcare and social service partners by integrating mobile service delivery and uses a multi-disciplinary team to engage with individuals who are underserved by traditional healthcare pathways.
